

Handling data coursework: Module 2

Hypotheses

Task: _____

Name: _____

After reading the task briefs, decide upon which task you would like to investigate and complete this sheet. Use the information here to help you with the write up of your plan. For the higher marks, you will need to write a detailed and structured plan using statistical terms and justifying your decisions.

Write a hypothesis for the idea given in the project brief:

Hypothesis 1:

What data will you need to collect to help you justify or disprove your hypothesis?

Write another hypothesis you would like to investigate:

Hypothesis 2:

What data will you need to collect to help you justify this hypothesis?

How might you develop or extend your work?

What data will you need to collect for your extension?

Are there any practical problems regarding the collection of the data you require?

How do you think bias might be avoided?

Note any other thoughts you have below.
